**Statement for the High Commissioner's Dialogue on Protection Challenges
Theme: Understanding and addressing root causes of displacement, 16-17
December 2015, Palais des Nations, Geneva**

Thank you Chair,

I wish to express my deep gratitude and congratulations to all of you for your enormous endeavors for a better world and add a short message of hope, as we have reached the darkest point in history, which will not last much longer.

The whole world is in transformation and will change mainly through politics, economics, ^{inclusive} education and awareness raising.

We are moving in a completely new era of Synthesis, Peace and Harmony and are now experiencing the birth pains of a new civilisation. This is a cosmic fact, as we are moving out of the Age of Pisces into the new Age of Aquarius, which will last for the next app 2'300 years.

Humanity has evolved in Science and Technology and we are now ready for the next big step ahead by expanding our consciousness and our awareness to understand who we really are, where do we come from, where are we going, why are we here and that we are Souls in Incarnation, journeying together on a long path of evolution till we become Masters ourselves. When we become aware, that we have been living and will be living on different continents, sometimes as a man, sometimes as a woman, experience all the colors and different religions, then we no longer need all these hatred, racism, envy, egoism, separatism, violence and violence against women, ^{minorities} and children and understand that these are all conditionings, which we can overcome and let go.

That is why Maitreya the Christ and World Teacher for all Humanity - for people of all faith and for those of none - and Architect for the global Transformation, as well as 14 Masters of Wisdom, our elder brothers, are now in the World, ready to guide us through this most difficult transition.

They cannot just come and interfere with our free will. They need an invitation to work openly together with Humanity.

Let us therefore now invite our Lord - by whatever name we may call Him - and the Masters, so that They may come and help us create a new world of sharing, trust, justice, peace, cooperation, solidarity and UNITY of all Humankind!

↳ inclusive education for all

**Loka samasta sukhino bhavantu! May all the people in all the worlds be happy!
OM shanti, shanti, shanti! Peace within us, Peace within the Nations and Peace
in the whole World!**

Thank you all for your kind attention!

Another brief oral statement

Thank you Chair and all of you for your presentations. I wish to add that we are moving in a completely new era of synthesis, justice, peace and harmony and **we are now waking-up for reality and understand that:**

**There is only one religion - the religion of love
There is only one language - the language of the heart
There is only one race - the Human Race and we are all One
There is only one GOD - He is omnipresent and has different names!**

Thank you Mariela, especially for **your extraordinary musical performance, which marks the new Era and brings real Transformation for all participants, as light and sound is the new art of healing, necessary on one or another plane for all Human Beings!**

Congratulations Mariela! Sincerely yours, Roswitha Grass.
