# Occupation

| Equality in employment: main results                        |                                  |                                   |                              |
|---|----------------------------------|-----------------------------------|------------------------------|
|   | Persons with severe disabilities | Persons with disabilities (total) | Persons without disabilities |
| Activity rate (%) <sup>1</sup>                              | 49.3                             | 73                                | 87.9                         |
| Employed persons (%) <sup>1</sup>                           | 42                               | 68.1                              | 84                           |
| Employed persons: full-time (%) <sup>1,2</sup>              | 52.4                             | 61.2                              | 71.4                         |
| Working conditions (average satisfaction) <sup>3</sup>      | 7.1                              | 7.6                               | 8                            |
| Energy after work to do other things (average) <sup>3</sup> | 3.5                              | 4.6                               | 5.4                          |
| Discrimination at work due to a disability (%) <sup>4</sup> | 16.5                             | 5.1                               | 0.3                          |

1 SILC 2015, version 19.06.2017. Population aged 16 to 64 years living in a private household.

2 As % of employed persons. Full-time: 36 hours or more per week

3 SILC 2014, version 24.05.2016. Population aged 16 to 64 years living in a private household. Average score on a scale of 0 (-) to 10 (+).

4 SHS 2012. Population aged 15 to 64 years living in a private household. As % of employed persons. All people are asked this question. For this reason persons without disabilities as under the Disability Discrimination Act can also indicate that they are discriminated against.
