

Responsibility of Department of Food and Drug Administration

The Department of Food and Drug Administration is responsible for the enforcement of bottled drinking water factory in compliance with good manufacturing practice (GMP) and issue recommendation if they comply with good manufacturing practice (GMP). The validity of recommendation for bottled drinking water factory is two year. The factories were inspected every two year and sometimes they were checked surprisely. When the factories were found that they do not comply with GMP during surprise check, they are prohibited for manufacturing and asked to renovate until they comply with GMP.

During the post market surveillane activities, it was found that the bottled drinking water factories have no recommendation from our department, we announce them in the newspaper that they have no grantee for safety and quality.
