Objectives of the module

- Identify and use the various components of the Office of the United Nations High Commissioner for Human Rights' Resource Package on Promoting the Rights of Persons with Disabilities through the Sustainable Development Goals
- Implement tools to support policy makers to understand the situation of persons with disabilities.
- Gain an understanding of the current situation in terms of how poverty and lack of access to adequate social protection impacts persons with disabilities.
- Identify concrete steps that policymakers can take to guarantee adequate measures to end poverty and provide adequate social protection in the process of implementing Sustainable Development Goal 1 with a disability rights lens.
- Learn how to obtain additional information to support implementation of social protection and poverty reduction measures in their context.

Models of disability

Charity Model of Disability

- People with impairments perceived as objects of benevolence who cannot take care of themselves.
- Conditions participation to receiving "help" or charity.
- Having impairments is seen as a curse or punishment.

Medical Model of Disability

- People with impairments seen throughout history as persons who are sick or subjects of rehabilitation.
- Reduces persons to their impairment and conditions participation to being rehabilitated or "fixed" to meet societal norms and to fit back into society.

Ableism

"[A] value system that considers certain typical characteristics of body and mind as essential for living a life of value. Based on strict standards of appearance, functioning and behaviour, ableist ways of thinking consider the disability experience as a misfortune that leads to suffering and disadvantage and invariably devalues human life".

Special Rapporteur on the rights of persons with disabilities, Report on the impact of ableism in medical and scientific practice, A/HRC/43/41, 2019
