Models of disability

Charity Model of Disability

- **People with impairments perceived as objects of benevolence who cannot take care of themselves.**
- **Conditions participation to receiving “help” or charity.**
- **Having impairments is seen as a curse or punishment.**

Medical Model of Disability

- **People with impairments seen throughout history as persons who are sick or subjects of rehabilitation.**
- **Reduces persons to their impairment and conditions participation to being rehabilitated or “fixed” to meet societal norms and to fit back into society.**

Ableism

“[A] value system that considers certain typical characteristics of body and mind as essential for living a life of value. Based on strict standards of appearance, functioning and behaviour, ableist ways of thinking consider the disability experience as a misfortune that leads to suffering and disadvantage and invariably devalues human life”.

**Special Rapporteur on the rights of persons with disabilities,
Report on the impact of ableism in medical and scientific
practice, A/HRC/43/41, 2019**
