## Water for the World™

## Contributing to realise Wat-San Human Rights

Sylvain Lhôte - Borealis Group
Good practices consultation of
UN independent expert on water and sanitation

Lisbon, 04 November 2010

### **Borealis at a Glance**

- Leading provider of chemical and innovative plastics solutions that create value for society
- More than 50 years of experience and technology leadership (Borstar®)
- 5,200 employees in over 20 countries; €4.7bn net sales; producing in 8 countries (EU, US, BR)
- Ownership 64% IPIC / 36% OMV
- Joint venture in Middle East and Asia: Borouge
- Committed to advance sustainability through Responsible Care®

### Water for the World™

- Programme launched in October 2007 by Borealis and Borouge to contribute addressing the global water challenge
- Focus on
  - Access to fresh water and sanitation
  - Sustainable water management
  - Best-practices promotion
  - Awareness raising
- Projects delivered in partnerships with experts, local NGOs and our value chain.

# Water and sanitation as human rights

- We consider water and sanitation (Wat-San) as basic human rights
- Our business contribution to realising Wat-San rights builds on a three pillars approach

Respect to fulfil the rights Protect to secure the rights Leverage to realise the rights

## Respecting

## HR through ethics policy compliance

- Respect: a founding Borealis' value
- Ethics: one of the group's 10 governing policies
- HR specifically covered (child labour, right of expression, non-discrimination, incl. "basic rights")
- Mandatory compliance part of employees contract
- Implementation via
  - Ethics "ambassadors" in all departments
  - 2 to 3 years cycle training of all employees
  - 24/7 question line and case reporting

## **Protecting**

## Wat-San rights of our local communities

- Water risk mapping
- Footprint modelling / assessment
- Waste water treatment as per BAT
- Chemical stewardship and black-list
- Neutralisation of investments footprint in potential stressed areas
- Upgrading of community supply systems

# Leveraging

## Expertise and solutions for Wat-San rights

#### With W4W local projects

- Building up value chain local partnerships to secure sustainable water access and sanitation
- China
- India
- Middle-East
- Nepal
- Tanzania
- Vietnam

#### With international partners

 Working with service providers and strengthening their capacity to deliver services to the urban poor

- Bangladesh
  - Ghana
    - India
  - Kenya
- Madagascar
  - Mali
- Mozambique
  - Zambia

# **Project example**

# Malkapur, India

→ 54 km of water mains to secure 24/7 supply in the rural community of Malkapur, State of Maharashtra, India.

#### Challenge

- Inadequate supply for 14 000 people out of 30 000
- Intermittent water distribution plagued with leak rates > 35%

#### **Support**

- Design advice and material engineering
- Project facilitation with Maharashtra Jeevan Pradhikaran
- Installation support and know-how transfer

#### **Outcome**

- 100% coverage and capacity to handle population growth
- Continuous supply and leak rate < 5%</li>

# **Project development**

- ✓ Domestic accessibility
- ✓ Cultural acceptability
- ✓ Affordability (< 30USD)</p>
- ✓ Safety (storage to disposal)
- ✓ Sustainability (social services)
- ✓ Potential impact: 500 000 households in New Delhi

#### **Support**

- Material engineering
- Design advice
- Kick-off funding
- Material supply and prototyping
- Research of value chain partners
- Pilot assessment

# What have we learnt to further deploy good practices?

- Wat-San Human Rights are
  - Primarily a local governance issue,
  - Magnified by sustainable cost-recovery problems
- Their realisation also requires to address
  - Awareness and know-how gaps
  - Together with water stewardship needs
- Sustainable solutions exist
  - Scalability and cost-efficiency are key
  - Vast potential resides in bridging social and technical expertises
