

To the attention of High Commissioner of Human Rights,
Dear Madam/Sir,

The Peace Association of Turkey, is one of the rooted organizations of the Turkish social and political environment. The association has been founded in order to establish and maintain a peace movement against imperialist aggression world wide. The Peace Association of Turkey has two branches at two major cities of Turkey and it is a member of The World Peace Council.

We have already informed that you initiated an assessment procedure about Cuba in the scope of Universal Periodic Review (UPR) mechanism. Since the review procedure is open to views of NGOs according to the Council Resolution 5/1 Institution-building of the United Nations Human Rights Council, we would like to share our consideration with you.

Our association strongly believes that Cuba plays a strong and important role in the world peace movement. The people's will and initiative which are directly represented in Cuba's government should be supported in terms of its contribution to the liberation of the people of other countries. The peaceable policies and position of Cuba in the world agenda is important. The support for Cuba becomes mostly crucial when the imperialist expansionism and aggression are taken into consideration. The solid position of the Cuban government with its people is one of the most strong barriers against imperialist war plans. Cuban people is one of the most favorable examples for people living in peace.

The Peace Association of Turkey aims to collaborate with anti-imperialist forces and humanistic political powers. That's why, it is one of our top priority concerns, to support and collaborate Cuban people in every stage.

With all these rationale we felt obliged to write this letter to you. We have no doubt that you will take our opinions into concern.

Sincerely yours,

Burcak OZOGLU

Executive Board Member

The Peace association of Turkey
